SERVICE DISCONTINUATION

Dear Valued Neogen® Customer,

We wish to notify you of the discontinuation of the Neogen Megazyme range product **Enzymatic Yeast β -Glucan Assay Kit (Ref: K-EBHLG, SKU: 700004278)**.

This decision is based on an effort to simplify yeast and mushroom β -glucan measurement, bringing both together under one superior product offering. This will increase clarity on method selection in the yeast and mushroom β -glucan industry. The replacement product information is as follows: **β -Glucan Assay Kit (Yeast and Mushroom) (Ref: K-YBGL, SKU: 700004358)**.

The **β -Glucan Assay Kit (Yeast and Mushroom)** is a simple to use and robust product suitable for the analysis of both yeast and mushroom β -glucan. This product offers the same sensitivity as that of the enzymatic yeast β -Glucan assay kit while also providing more tests per kit.

Neogen is happy to help support implementation of this assay in your operation to ensure minimal interruption to your process and will continue to provide technical support for the discontinued item until it reaches expiration. Please reach out to your sales representative if you require stocks to validate β -Glucan assay kit (Yeast and Mushroom) versus enzymatic yeast β -Glucan assay kit. Sales of the enzymatic yeast β -Glucan assay kit will continue for a period of approx. 8 weeks or until current packed stocks are exhausted to allow for this transition. For any additional details, or if you have any other questions, please reach out to your sales representative.

Neogen is committed to supplying products that meet your quality and product performance standards needs and to offering products that suit our customers' varying needs in the most uncomplicated way. We thank you for your business and continued support of Neogen.

Sincerely,

Bridget Culleton
